

MaxWAX® 70

Wax Alloy

Product Description:

MaxWAX® 70 is a micronized wax alloy designed to give the high performance of PTFE. It provides an optimum combination of COF and wear resistance when added to inks and coatings. It is the first of a new line of PTFE alternative and PFAS free waxes.

Application:

MaxWAX® 70 has undergone considerable development work in Shamrock's laboratory and has been found to provide an excellent combination of slip and wear resistance in many inks and coatings. It is effective in high temperature cured inks and coatings and typically used at 1-3% of total formula weight.

Features and Benefits:

-  Static and Dynamic Slip
-  Abrasion/Rub/Mar/Scuff/Scratch Resistance

Typical Properties:

 Appearance:	White Micropowder
 Melting Point	130-135°C
 Particle Size Mean Value	4-6 microns

Regulatory Status:

The components of this product are listed on multiple chemical inventories. For specific information on the applicable chemical inventories, please refer to the product SDS.

Safety, Shipping and Handling:

For complete safety, shipping and handling information please contact your regional Customer Service Representative, or our Customer Service Team at customerserviceteam@shamrocktechnologies.com.
