

CeraSPERSE® 70F

Wax Dispersion

Product Description:

CeraSPERSE® 70F is a stable dispersion of wax powder in a general use lithographic vehicle.

Application:

CeraSPERSE® 70F provides excellent rub and slip performance in offset inks with a consistent fine particle size distribution that insures high gloss in finished print. Particularly recommended for web-offset heat-set, due to performance on high speed press. CeraSPERSE® 70F has a soft rheology, thixotropic behaviour, pumpable at long distances, suitable for automated metering and distribution systems.

CeraSPERSE® 70F can be easily incorporated in ink compositions with minimum mixing allowing uniform distribution at any stage of ink production.

Recommended Level:

2 - 4% of the total formula weight

Typical Properties:

	Appearance:	Off White Soft Paste
	Particle Size Mean Value:	5 µm
	NPIRI Grind:	2.5 Max
	% Active Ingredients:	40 %

Regulatory Status

The components of this product are listed on multiple chemical inventories. For specific information on the applicable chemical inventories, please refer to the product SDS.
